

# ONE DAY OF FUN AND LEARNING!

**JUNE 23<sup>RD</sup> 2018**

WE NEED EVERYONE INCLUDING MOMS OR OTHER CAREGIVERS AND TEACHERS TO RAISE TECHIE GIRLS

This free program will engage mothers or the main caregivers alongside their 9th and 10th grader daughters and teachers in coding. This is part of an effort to invite parents and teachers to join in the effort of bringing coding to their schools, homes and their dinner conversations. We plan to teach Scratch to participants in an effort to program a small humanoid called "NAO".

This workshop is part of Summer Enrichment Program in STEM at USF Sarasota Manatee. Program participants will include 20 girls, 20 parents/caregivers, and one teacher from each participating school. The participants will be female 9th and 10th graders selected from regional high schools (within 30 miles radius). Transportation is not provided.

## JUNE 23<sup>RD</sup> 2018

**9:00am—4:00pm**

Lunch and refreshments will be provided

**Girls + STEM = Empowered**

Space is limited. Apply Now by visiting
